

Terry Valley-Trojan Water Project District

PO Box 515, Lead, SD 57754

605-722-7560

May 1, 2024

To: Terry Valley-Trojan Water Project District (TTWD) Members,

The Terry Valley-Trojan Water Project District Annual Board meeting occurred on April 22, 2024, at 4:00 PM, at the Deadwood Chamber of Commerce Conference Room at 501 Main Street, Deadwood, SD.

Three (3), three (3) year term board member seats that Janell Berg, Bill London, and Peder Torgerson have fulfilled were up for election. No petitions were received by the March 23, 2024, deadline. Therefore, the Terry Valley-Trojan Water District Board reappointed Janell Berg, Bill London, and Peder Torgerson to the open positions at the annual meeting. Janell Berg was reappointed as Chairperson, and Mike Hale, Vice-Chairperson, both reoccurring.

The 2023 Terry Trojan Water Drinking Report is available for viewing and download at

www.terryvalley.org/upload/annualwaterreport.pdf

No violations from 2023 were reported. TTWD received the Secretary's Award for providing 10 consecutive years of Drinking Water Excellence (no violations).

We continue ongoing efforts to monitor water loss and appreciate when you report seeing suspicious groundwater. Often, it's just a natural spring; however, it's better to let us test it than to lose the water.

We plan to have the meter pit project close to completion by the end of September. We appreciate your patience during this critical project, which will help manage the district's water conservation.

Lead-Free SD has initiated a campaign to locate, identify, and eliminate lead pipes in your home. In 1986, the EPA prohibited using lead pipes in building homes. The campaign asks the homeowner to help with the Lead-Free survey by running and reporting a simple test. For those of you who own a home built before 1986, we have enclosed a flyer that provides information on testing the pipes and reporting the findings. Please take the time to review the enclosed Lead-Free SD flyer.

Last season, the meter pit project resulted in the discovery of several service line leaks. As these leaks are found, the water service is turned off, and the district notifies the property owner. If residents reside in the home, the district will notify the property owner before turning off the water. The property owner is responsible for repairing the service line between the curb stop and the house. NOTICE: All excavation and materials are the sole responsibility of the property owner for service line repairs between the curb stop and the home.

The BOD continues to move forward with the project to replace the 125,000-gallon concrete water storage tank with a 150,000-gallon steel water storage tank. Funding for this project has been obtained, and AE2S engineers are working on the designs and plans.

The Terry Trojan Water Districts webpage, www.terryvalley.org, offers current water district information. In addition, you will find the approved Ordinance, Application for Water Service, Current Annual Drinking Water Report, Agendas, Approved Meeting Minutes, ACH Application, and other information for TTWD Members.

The TTWD BOD has changed the New Water Service Application Fees and Outline of Responsibilities for new hookups. The newly approved Water Service Application and Ordinance can be found at www.terryvalley.org.

NEW—Emergency Text Notification: If the water service is disrupted due to a leak or other service issues, we will notify our members by sending an Emergency Text Notification. To subscribe to our **Emergency Text Notification** on your **cell phone**, text **join** to **844-735-2852**. This text notification system remains private to all. To unsubscribe, text **STOP or END** to **844-735-2852**.

When selling or purchasing a home in the Terry Peak Development, TTWD must be notified of any billing service changes. Individual meter readings for proration are unavailable; service must be prorated between the buyer and seller. Any questions, billing, or service issues must be directed to Linda Derosier at 605-722-7560 or terrytrojanwater@rushmore.com.

This letter includes the ACH Application for those who wish to enroll in the TTWD ACH direct payment program for their water service. A digital ACH Application is also available for print at www.terryvalley.org. Please note that activation takes at least 45 days once the application is received.

As we add more users to the system, demand increases. We aim to supply safe, clean water while meeting the demand. For any emergency service issues or questions, call Linda Derosier at 605-580-1078.

I am grateful to the Terry Valley-Trojan Water Project District Board of Directors for their continued years of service.

Respectfully,

Linda Derosier, Executive Director

Terry Trojan Water District
